### **Experience**

Engineered Soil Repairs, Inc.

**Project Engineer**, July 2002 to Present

**Staff Engineer**, May, 1999 to July 2002

**Laborer**, 1992 to 1995

Provides civil engineering consulting and design work for soil-related issues. Responsibilities include designing retaining walls of all types; repairing shallow and deep foundations issues, assessing ground modifications, landslide repairs, creek bank stabilizations, drainage systems, and residential seismic retrofits.

Conducts site inspections for construction defect litigation, real estate transactions, and private homeowners. Other responsibilities include supervising all phases of the engineering and construction process, presenting proposals, and managing the completion of the actual project. Completed projects include:

- Freidin Sub-Grade Elevator Shaft
- Hazelton Basement Foundation Replacement
- El Alamo Drive Storm Drain Re-Routing
- Ocean Harbor House, Monterey, CA
- Freeman Creek Bank Stabilization

### **Education**

**California State University, Sacramento**

Bachelor of Science, Civil Engineering, Completed 1999

**California State University, Sacramento**

Master of Science, Geotechnical Engineering, Completed 2004, 3.5 GPA.

Thesis/Project: "Mitigation of Sulfate Attack on Existing Structural Foundations"  
Geotechnical and structural concentration

### **Professional Memberships**

- Registered Professional Civil Engineer, California License No. C63465
- Member, National Society of Professional Engineers
- Member, American Society of Civil Engineers
